

Aclara RF Network Gas and Water

MTU Programmer and Mobile Wireless Programming Puck

Aclara water and gas Meter Transmission Units (MTUs) are deployed using the Aclara RF MTU Programmer device connected via Bluetooth technology to any mobile device running

The wireless programming device's design and accompanying hanger clip allow "hands-free" operation with all Aclara water and gas MTUs as well as ZoneScan II leak detection Sensor Transmission Units.

OVERVIEW

The MTU Mobile Programmer app is built around easy to understand commands and common-sense programming steps. The app and programming device allows the operator to confirm correct connectivity to both the endpoint and the Data Collector Unit network, as well as assure the collected meter reading matches the dials. Adding or replacing MTUs or meters are simple functions that are also included.

Third party Work Order Management Software (WOMS) can be supported in scripted mode.

Aclara RF Network Gas and Water MTU Programmer and Mobile Wireless Programming Puck

MTU PROGRAMMER AND MOBILE WIRELESS PROGRAMMING PUCK

Dimensions	1.875" x 1.6875" x 2.25
Weight	2.2 oz
Drop survival	4 feet
Operating temperature range	-40°C to +60°C
Storage temperature range	-40°C to +85°C
Operating humidity range	5 to 95% noncondensing
Storage humidity range	5 to 95% noncondensing
Ingress protection	IP67
Allowable tilt	Up to +/- 20° from MTU coil axis
Allowable misalignment	Up to +/- 0.5" from MTU coil center

Specifications subject to change without notice.
